## WORKING EXPERIENCE

**PT. Brajatama,** Jakarta                                            Sep – Des 2024
*Full-Stack Web Developer*

- Led the development of scalable web features by integrating Laravel  and React.js to support internal business operations
- Designed, implemented, and optimized relational database schemas, improving data retrieval efficiency by structuring clean and maintainable models and migrations
- Developed modular CRUD functionalities with validation, error handling, and responsive interfaces
- Participated in version control, code review, and issue tracking using Git & GitHub

**PT. Cazh Technology,** Purwokerto                                   Jul – Oct 2024
*Full-Stack Web Developer*

- Led the Development and maintenance of responsive Library Management System web applications using Laravel and React.js
- Implemented Single Page Applications (SPA) with Inertia.js
- Utilized Tailwind CSS for frontend styling
- Collaborated on testing, deployment, and API integration

**Bangkit Academy by Google, Tokopedia, Gojek, & Traveloka**, Bandung          Aug 2023 – Jan 2024
*Android Developer*

- Learned modern Android app development using Kotlin
- Applied MVVM architecture, Room Database, and Retrofit in real apps
- Built a capstone project focused on providing social/educational solutions
- Mentored by professional engineers from top Indonesian tech companies

## EDUCATION

**Telkom University**                                                Aug 2021 – Aug 2025
*Bachelor of Information Systems*
GPA 3.67 of 4.00

## ACHIEVEMENTS

**Funding Recipient – Student Creativity Program (PKM-KC)**                    Aug 2024
*Awarded national funding by the Indonesian Ministry of Education for the development of a multi-platform traditional Javanese chess game (Catur Jawa).*

## CERTIFICATIONS

**Junior Web Developer**                                              Oct 2024
*National Professional Certification (BNSP – Indonesia)*

**Bangkit Specializing in Mobile Development**                        Oct 2024
*Bangkit led by Google, Goto, and Traveloka*

## LANGUAGES AND SKILLS

- Bahasa Indonesia (Native), English (Limited Working Proficiency)
- Laravel, Inertia.js, React.js, Tailwind CSS, Blade – Building responsive, SPA-like modern web applications

with Laravel and React via Inertia stack.

• RESTful API Development, API Integration – Creating and consuming APIs for communication between backend and frontend systems.

• MySQL, Database Design, Eloquent ORM – Designing and managing relational databases efficiently using Laravel's ORM.

• Git, GitHub, GitHub Actions – Version control and basic CI/CD workflows for deployment automation.

• Postman, API Testing, Debugging – Testing endpoints, validating responses, and troubleshooting API errors.

• Authentication & Authorization – Implementing secure user access control using Laravel Sanctum or built-in auth systems.

• Agile Development, Scrum (basic) – Working in iterative team-based environments, adapting to sprint-style development.

• Basic DevOps (optional) – Deploying Laravel applications to shared hosting or VPS, using Linux command line and services like Nginx/Apache.

• UI/UX Awareness, Responsive Design, Component-Based Frontend Development – Creating usable, consistent interfaces across devices.

• Passionate in: Web Engineering, Backend Architecture, Fullstack Development, and Building Scalable Internal Tools.
